Vision of our future world

There is no doubt that humanity is putting itself and all life forms in increasing danger, not due to a lack of knowledge, science and ingenuity but more due to a lack of wisdom and overarching purpose of intergenerational responsibility and little desire for qualitative improvement and flourishing for all.

Provide for 40% more people while:

- Addressing poverty and exclusion
- Using less water, land, ocean food resources
- Changing our consumption patterns
- Quadrupling the global energy supply
- Addressing climate change, biodiversity loss etc.
- Creating employment in decent work

Charles A. Hopkins - UNESCO Chair in Reorienting Teacher Education to Address Sustainability, York University, Toronto, Canada

The big challenge

How can we create an economic system

that enables individuals and communities to thrive equitably

while also

sustaining the capacity of the environment to support this for future generations?

Sustainable development

"Sustainable development is development that meets the needs of the present, without compromising the ability of future generations to meet their own needs."

Or, in short

Enough, for all, forever

Charles A. Hopkins - UNESCO Chair in Reorienting Teacher Education to Address Sustainability, York University, Toronto, Canada

From Commitment to Action

Global goal SDG4: "Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all"

7 Targets (4.1 – 4.7) and 3 Means of Implementation (4a-c)

Global Education Monitoring Report 2 0 1 6

0

Global Education Monitoring Report

Target 4.1: Primary and secondary education 263 million children, adolescents and youth are out of school.

Target 4.2: Early childhood care and education Pre-primary education is compulsory for at least a year in **50** countries

Target 4.3: TVET, higher education and adult education **207** million are now enrolled in tertiary education worldwide

Less than 1% from the poorest households complete 4 years or more of tertiary education.

Charles A. Hopkins - UNESCO Chair in Reorienting Teacher Education to Address Sustainability, York University, Toronto, Canada

Global Education Monitoring Report

Target 4.4: Skills for work

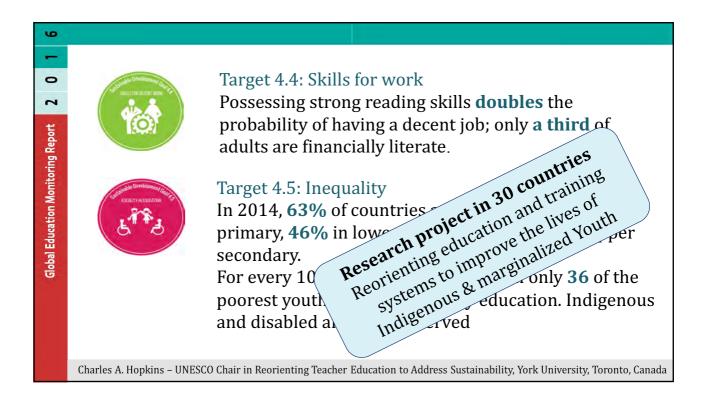

Possessing strong reading skills doubles the probability of having a decent job; only a third of adults are financially literate.

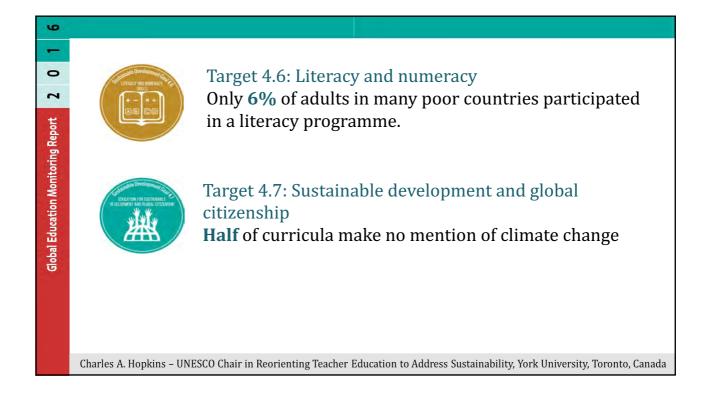

Target 4.5: Inequality

In 2014, 63% of countries achieved gender parity in primary, 46% in lower secondary and 23% in upper secondary.

For every 100 among the richest youth only 36 of the poorest youth complete primary education. Indigenous and disabled are poorest served

2 new global challenges

Learning to live together with "others" "sustainably" Seeking "well-being" for all

Charles A. Hopkins – UNESCO Chair in Reorienting Teacher Education to Address Sustainability, York University, Toronto, Canada

An inclusive education ensures economic growth is sustainable and doesn't leave anyone behind

Charles A. Hopkins – UNESCO Chair in Reorienting Teacher Education to Address Sustainability, York University, Toronto, Canada

Progress in health, nutrition and gender equality is inextricably linked with progress in education

An inclusive education is a powerful preventive tool and antidote for violence

Charles A. Hopkins – UNESCO Chair in Reorienting Teacher Education to Address Sustainability, York University, Toronto, Canada

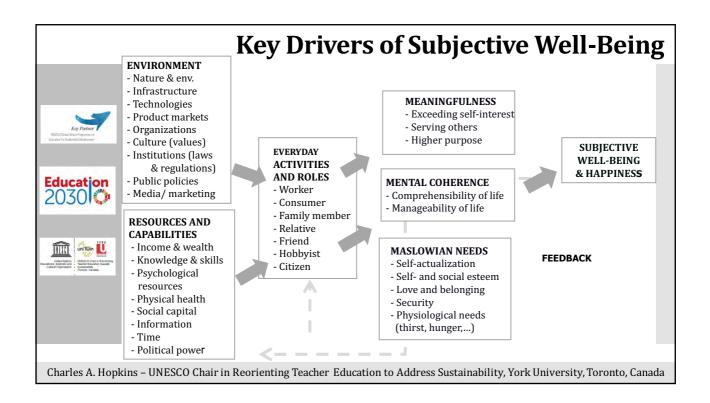

Education must be integrated into urban planning to create sustainable cities
